Acknowledgement

I wish to strongly express my thanks to the DAAD (German Academic Exchange Service) for my DAAD-Scholarship and also to the Ministry of Education, that let me abroad for my studying in Germany.

I want to express my deepest thanks to Professor Dr. Erich Zeeck who introduced and guided me into a most interesting line of research field and patiently encouraged me during my Ph.D. studies.

I am grateful to the Fachbereich 9 Chemie of the Universität Oldenburg, that let me enrol as a Ph.D. student.

I would like to thank our group, especially Dr. Frank Priesnitz, Dipl. Chem. Ingo Röhl and Dipl. Chem. Andreas Hibbeler for their advice, encouragement, support and discussions. I am indebted to Anke Brakenhoff for her various help during my studies.

Moreover, I want to express my thanks to Dr. Tilman Harder who advised, taught and guided me for the alarm pheromone theme. Thanks are also due to Dipl. Biol. Andreas Hyde from Tübingen University, and to Dipl. Biol. Andreas Stief, who guided and supported me with my bioassays in my laboratory.

I am also grateful to Dieter Neemeyer for the NMR measurements and to Prof. Dr. Wilfried Tuszynski and Nobert Diehl (Moleküle and Biophysik group at the Universität Oldenburg) for their MALDI measurements.

Many thanks to Dipl. Chem. Ralf Willenborg, Dr. Dagmar Röhm, Dipl. Phys. Jürgen Kuls, the families Finkenmeyer, Fritsche, Bunnanmann and, Myint for their most positive influence on my work and for their support from many directions and encouragement.

Besides, I would like to thank Priv.-Doz. Dr. Hans-Uwe Dahms, Richard Dawson and Thi Finkenmeyer for their careful reading and correction of my manuscript, as well as for providing many an opportunity for fruitful discussions on my work.

Finally, I send my deepest thanks to my parents, all teachers and all benefactors for their guidance.

Dedicated to my parents
