1	Introduction	2
2	The 1-dimensional Regression Model	9
2.1	The Redescending M-Kernel Smoother—Shrinking Scale Parameter	11
2.1.1	Definition and Assumptions	11
2.1.2	Existence and Uniqueness	13
2.1.3	Consistency in a Smooth Region under Assumptions \mathcal{A} . . .	13
2.1.4	Consistency at a Jump Point under Assumptions \mathcal{A}_0 . . .	20
2.1.5	Inconsistency under Assumptions \mathcal{B}	24
2.1.6	Nonrobustness	29
2.2	The Redescending M-Kernel Smoother—Constant Scale Parameter	32
2.2.1	Definition and Assumptions	32
2.2.2	Consistency in a Smooth Region	34
2.2.3	Consistency at a Jump Point	36
2.2.4	Robustness	38
2.3	The Monotone M-Kernel Smoother	40
2.3.1	Definition and Assumptions	40
2.3.2	Existence	41
2.3.3	Consistency in a Smooth Region	42
2.3.4	Inconsistency at a Jump Point	47
2.3.5	Robustness	49
3	The 2-dimensional Regression Model	53
3.1	The Redescending M-Kernel Smoother—Shrinking Scale Parameter	57
3.1.1	Model and Assumptions	57
3.1.2	Existence and Uniqueness	58
3.1.3	Consistency in a Smooth Region	58
3.1.4	Consistency at a Corner Point	60
3.2	The Redescending M-Kernel Smoother—Constant Scale Parameter	71
3.2.1	Assumptions and Definitions	71
3.2.2	Consistency in a Smooth Region	71
3.2.3	Consistency at a Corner Point	72
4	The TM-Estimator	74
4.1	Definitions	74
4.2	Robustness	75
5	Simulations	78
6	Appendix	83
