Kurzfassung (Abstract in German)

Abstract

Contents

1	Introduction	1
1.1	Scope and framework	1
1.2	C ₃ , C ₄ and CAM plant characteristics and factors controlling their contribution to the vegetation	3
1.3	C ₃ , C ₄ and CAM plant distribution on the southwestern African continent	15
1.4	Principles of stable carbon isotopic composition of organic plant material, a geochemical tool unravelling the use of the C ₃ and C ₄ pathways	17
1.5	Motivation, outline and objectives of this project	24
1.6	Outline of the author's contribution	27
2	Chemotaxonomic significance of distribution and stable carbon isotopic composition of long-chain alkanes and alkan-1-ols in C₄ grass waxes	30
2.1	Abstract	30
2.2	Introduction	31
2.3	Description of sampling area, samples and methods	37
2.3.1	<i>Description of sampling area: Grass diversity and distribution in southern Africa</i>	37
2.3.2	<i>Samples</i>	38
2.3.3	<i>Analytical and evaluation methods</i>	41

2.4	Results	43
2.4.1	<i>Contents and carbon number distributions of long-chain n-alkanes of grass waxes</i>	43
2.4.2	<i>Molecular carbon isotopic signatures of long-chain n-alkanes of grass waxes</i>	46
2.4.3	<i>Contents and carbon number distributions of long-chain n-alkanols of grass waxes</i>	48
2.4.4	<i>Molecular carbon isotopic signatures of long-chain n-alkanols of grass waxes</i>	49
2.5	Discussion	49
2.6	C₄ grass wax adaptation and implications for palaeoenvironmental studies	53
2.6.1	<i>C₄ grass wax adaptation to the climatic conditions of the habitat</i>	53
2.6.2	<i>Leaf wax n-alkane and n-alkanol homologues as palaeoclimatic proxies</i>	55
2.7	Conclusions	58
2.8	Appendix	59
3	A north to south transect of Holocene southeast Atlantic continental margin sediments: Relationship between aerosol transport and compound-specific $\delta^{13}\text{C}$ land plant biomarker and pollen records	65
3.1	Abstract	65
3.2	Introduction	66
3.3	Materials and methods	70
3.3.1	<i>Sediment cores</i>	70
3.3.2	<i>Mass accumulation rates</i>	71
3.3.3	<i>Methods for lipid and pollen analysis</i>	71
3.3.4	<i>Satellite aerosol imaging</i>	73
3.4	Results and discussion	73
3.4.1	<i>Simplified phytogeographical units of southwest Africa</i>	73
3.4.2	<i>Carbon number distribution and molecular carbon isotopic signatures of long-chain n-alkanes</i>	74
3.4.3	<i>Carbon number distribution and molecular carbon isotope signatures of long-chain n-alkanols</i>	80
3.4.4	<i>Pollen distributions</i>	83
3.4.5	<i>Plant wax components of the transect sediments: biogeochemical and environmental considerations</i>	87
3.4.6	<i>Synoptic view of the north/south transect: lipid biomarkers and pollen from the African continent</i>	94
3.5	Conclusions	95

4	Glacial/interglacial changes in southern Africa: compound-specific $\delta^{13}\text{C}$ land plant biomarker and pollen records from Southeast Atlantic continental margin sediments	98
4.1	Abstract	98
4.2	Introduction	99
4.3	Material and methods	101
4.3.1	<i>Sediment cores</i>	<i>101</i>
4.3.2	<i>Mass accumulation rates</i>	<i>103</i>
4.3.3	<i>Methods for lipid and pollen analysis</i>	<i>103</i>
4.4	Results	104
4.4.1	<i>Simplified phytogeographical units of southwest Africa</i>	<i>104</i>
4.4.2	<i>Carbon number distributions and molecular carbon isotope signatures of long-chain n-alkanes</i>	<i>106</i>
4.4.3	<i>Carbon number distributions and molecular carbon isotope signatures of long-chain n-alkanols</i>	<i>112</i>
4.4.4	<i>Pollen distributions</i>	<i>113</i>
4.5	Discussion	115
4.5.1	<i>Temporal and latitudinal changes of aliphatic biomarker distributions and carbon isotope signatures</i>	<i>115</i>
4.5.2	<i>Pollen signals</i>	<i>120</i>
4.5.3	<i>Comparison of biomarker and pollen data</i>	<i>121</i>
4.6	Conclusions	125
4.7	Appendix	127
5	Summary and perspectives	133
6	References	138
7	Appendix	I
7.1	Supplementary data	I
7.2	Photographs	VI
